OBJECTIVE

Enthusiastic Computer Science graduate with strong skills in Java, Spring Boot, and full stack development. Seeking a software development role focused on building scalable web applications while contributing to a collaborative Agile team.

SKILLS

Annotation — Kognic - TP | Uai - Came, Elwood mine, Origami

Programming Languages — Core Java (proficient), HTML, CSS, JavaScript (Intermediate).

Frameworks/Tools — JDBC, Hibernate, Servlet, Spring Boot (Intermediate), Bootstrap, Git/GitHub, WordPress.

Databases — SQL, MySQL

Soft Skills — Communication, Teamwork, Problem Solving

Experience

11/2025 – 04/2026
Bangalore

Trainee Engineer - Data Annotation, Arctictern Solutions Pvt Ltd

- Worked on AI/ML data annotation and quality validation tasks for autonomous driving datasets.
- Used annotation tools such as Kognic (TP), UAI Cane, Elwood Mine, and Origami for data labeling and validation.
- Maintained high accuracy and consistency while handling large-scale datasets.
- Collaborated with QA teams and followed structured workflows and project guidelines.
- Contributed to improving training dataset quality for machine learning models and autonomous driving systems.

03/2025 – 10/2025
Bangalore

Java Full Stack Development Intern, JSpiders -Internship

- Learned and worked on Java Full Stack technologies including Core Java, JDBC, Servlets, Hibernate, Spring, HTML, CSS, JavaScript, and SQL.
- Developed mini-projects and practiced backend/frontend integration.
- Improved problem-solving and object-oriented programming concepts.
- Worked with database operations and web application development concepts.

INTERNSHIP

J-Spiders, Rajajinagar, Java Full Stack Development

Rooman Technologies, Bangalore, Cloud Application Developer

Compsoft Technologies, Machine Learning with Python

EDUCATION

2021 – 2025

B.E. Computer Science, Akshaya Institute of Technology

- CGPA: 8.17

2016 – 2021

PUC, Saint Francis DeSales PU College

- Percentage - 85%

PROJECTS UNDERTAKEN

Annapoorneshwari Supply – Commercial Business Website

- Developed and deployed a responsive commercial website for a real client using modern frontend technologies.
- Designed interactive business and product showcase sections with a mobile-friendly user interface.
- Improved user experience through responsive layouts, clean UI design, and optimized performance.
- Hosted and deployed the application using Netlify for public accessibility.

Tech Stack: React, JavaScript, HTML, CSS, Bootstrap, Netlify

AI-Powered Email Writer

- Developed an AI-powered email generation application using Spring Boot and Gemini API to automate professional email drafting.
- Integrated REST APIs and JSON-based communication for dynamic content generation.
- Improved email generation accuracy and reduced manual drafting effort through AI automation.

Tech Stack: Java, Spring Boot, REST API, JSON, Gemini API

Employee Attrition Prediction System

- Developed a machine learning-based prediction system to analyze employee attrition patterns using ML and deep learning models.
- Performed data preprocessing, model training, and model evaluation for HR analytics.
- Improved prediction efficiency and supported data-driven decision-making processes.

Tech Stack: Python, Machine Learning, Deep Learning, Pandas, Scikit-learn

LICENSES & CERTIFICATES

Machine Learning with Python — Comp soft Technologies (2023)

Cloud Application Developer — Rooman Technologies (2025)

Java Full-Stack Developer — J-Spiders (2025)
